

Hello! I'm Lusine Hovhannisyan

Quality Assurance engineer with strong multi-tasking abilities.
Eager to learn and extend the scope of knowledge and skills,
demonstrating aptitude for working in agile and fast-paced
environment.

</ If you're offered a seat on a rocket ship, don't
ask what seat! Just get on. />

Experience

Dec 2018 - present

QA Engineer
Tesvan LLC, Armenia

- Created automation test cases using Java and Selenium
- Implemented automated test cases using Appium Framework
- Integrated Cucumber in automation flow. Cypress makes setting up, writing, running and debugging tests easy.
- Implemented automation framework from scratch using Cypress framework.

Nov 2018 - Dec 2018

Internship (QA Engineering)
Tesvan LLC, Armenia

- Wrote test cases and bug/defect reports
- Implemented manual testing

Clients I have worked with

STAFFIDOO

I started working on this project and created automation tests from scratch using POM, Cypress framework, JS, and Cucumber/ Gherkin syntax. The challenge was that we didn't have documentation for clarifying project requirements and needed more investigations to understand the logic of the project. The project was built on big databases, and it required deep knowledge related to working with data. Full UI testing from scratch was conducted by me.

rr Radio Rentals
ESTABLISHED 1937

Worked on this project using Selenium and Java. As I was the only QA engineer on the project, I investigated features, did manual test, and created test plan after that implemented automation tests.

Funkgeräte-Vermietung.de
Professionelle Funkgeräte für Film, Event und Sicherheit

Fungereate was a project designed to sell and rent radios and related bundles. The website had both admin and client sides to configure product information and various payment methods. I worked on this project using Cypress and JS. I also used Docker for the project's local build, GIT and Linux commands as additional tools for my work.

BIMBIM

I started working with CodeceptJS. During this project, I created reusable test scenarios, as we had 4 sites and tests should have been run on all of those. In order to run the tests on mobile platform I used Appium as helper. As a CI/ CD tool I used Bamboo and Allure as a reporting tool. Also created Confluence pages for the features that I covered.

Skills

Professional Skills

Experience in

- writing test cases, bug/defect reports
- writing automation test via Appium, Cypress (UI and API)

Broad knowledge of

- STLC/ SDLC (Waterfall, V-model, Agile)
- Scrum and Kanban methodologies

Soft Skills

Attention to detail

Want-to-Learn Attitude

Teamwork

Problem solving

Fast Learning

Deadline oriented

Growth mindset

Communication

Tools & Technologies

Education & Trainings

Jul 2018 - Oct 2018

QA Engineering
Tesvan LLC

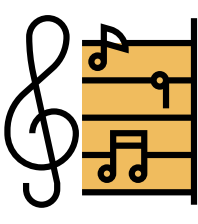

- Experience in writing test cases
- Experience in writing bug/defect reports
- Experience in Automation Testing
- Familiar with testing levels, methods and types

Informatics and Applied Mathematics
Yerevan State University of Armenia

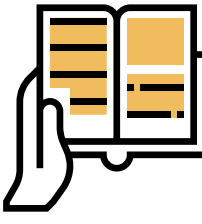

Sept 2016 - Jun 2020

Hobbies & Interests

Music

Enjoy spending my spare time indulging into real marvels of classical music

Reading Detectives

Reading detective novels helps me improve my analytical and critical thinking

History

Enjoy traveling in my home country and discovering its historical past and its rich culture
